

Melbourne Water's Healthy Waterways Strategy Refresh

Daniel Besley, *Regional Waterways Strategy*

The Healthy Waterways Strategy spans the Port Phillip and Westernport region for the next 50 years. It provides strategic direction for the management of a marvellous array of waterways, from iconic rivers such as the Bunyip, Yarra, Maribyrnong and Werribee, to wetlands such as the Ramsar-listed Edithvale-Seaford Wetlands and the vitally important rivers and creeks that generate so much community value such as the Steele, Merri, Darebin, Gardiners, Dandenong and Kananook creeks.

The presentation will focus on the collaborative process to develop it.
